Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Upon further consideration, prior art of record, taking individually or collectively, fails to fairly teach method and apparatus of maintenance power control for a subscriber unit including "transmitting signals to a base station which are initialized at a selected power level" and "adjusting the selected initial power level downwardly when a reply signal is received and upwardly when no reply signal is received within a predetermined time period of the transmission of the status signal whereby the selected initial power level is maintained at a level for efficient system communications", as claimed, in independent claims 1 and 11 (claims 2-10, 12-14 depend therefrom). Thus, claims 1-14 are found to be novel and unobvious over prior art of record.
